Master of Healthcare Administration **MHA**

### OUR FIVE WHY

- VALUE BEYOND LEARNING.
- PROVE AND IMPROVE YOUR LEADERSHIP SKILLS.
- MAXIMIZE YOUR RETURN ON INVESTMENT.
- START A HEALTHCARE BUSINESS
- COMPETENCY-BASED LEARNING.

## Value beyond learning

You receive guidance from our world-class admissions staff before you arrive, laying the foundation to maximize the program. You'll receive transformational professional development during the program.

# BE A HEALTHCARE CHANGE-MAKER

You want to do more for your organization and shape a better healthcare system for all. We're here to help you make it happen. Whether you choose to earn your degree through blended instruction or earn your degree at your pace, there's an option to achieve your dreams. Opportunities in healthcare management and administration are growing. Seize a leadership position

## Prove and improve your leadership skills

It takes more than lectures to make a leader. To truly lead you have to know yourself and your strengths, and understand other people's needs and desires. You must be ready to transform strategy into action.

Leadership training requires a rigorous combination of academic theory and learning by doing. At the JRU MHA, we teach you the theories behind leadership,

## Competency – based learning

The JRU University offers an MHA Competency-Based Learning, a self-paced degree program that puts you in charge. Go Your Own Pace, adapts to and

with an MHA from JRU. Coursework in this program explores the trends, regulations, laws, and health policies that impact health systems. Examine the latest technologies and best practices in the field while developing the advanced business skills that today's healthcare employers need.

then provide the ideal environment to put those theories to the test.

At the JRU, we take learning beyond the classroom to give you the skills to build your future as a healthcare leader, through Me, Inc., a intensive program in team-building and career development that sets you up for success over the next sixteen month.

your speed your style. Learn on Your Schedule. No weekly deadlines; you create your own start and end dates.

### THE DIFFERENCE THAT MAKES THE DIFFERENCE

Every day at the JRU MHA, students plant seeds for a bright future. By engaging patients in caring for their whole selves and co-creating convenient solutions that are good for the bottom line, examine the latest technologies and best practices in the field while developing the advanced business skills that today's healthcare employers need.

We call that the JRU MHA difference. You will call it the opportunity of a lifetime.

### MAXIMIZE YOUR RETURN ON INVESTMENT.

Here at JRU we believe everyone, everywhere should be able to study. Whether you are constrained by location, cost, life commitments or just by time, we are passionate about giving you access to Higher Education that fits with your hectic, modern life. Our students range from 18 to 80 years old and we support them both on-site and online. We are also proud to offer non-standard entry which means your work experience and previous qualifications are taken into account.

### START A HEALTHCARE BUSINESS

Our MHA is designed to develop and lead our student to the modern world of Entrepreneurs. Learn the fundamental and practical skills needed to start a venture, either within an healthcare organization or from scratch.

The Master develops leaders who possess the values, knowledge, and skills needed to work in a highly-competitive, market-driven environment. The MHA is a professional program for clinicians, administrators, researchers and managers who are seeing solutions to today's complex health delivery issues..

## LEADERSHIP

At the JRU, we take learning beyond the classroom to give you the skills to build your future as a business leader.

Your JRU MHA starts with Me, Inc., a intensive program in team-building and career development that sets you up for success over the next sixteen month. Lead with confidence based on a strong business foundation.

## KNOW YOURSELF

To be a successful leader, you must first understand yourself. In-depth, guided introspection begins prior to the start of your degree, then continues during orientation through our innovative Me, Inc. program. After Me, Inc., you will continue to discover more about yourself through your entire JRU experience.

## COLLABORATE

Effective leaders are also effective team members, able to influence regardless of status or position. As you build self-awareness, you will also build team-based skills, enabling you to tackle challenges through collaboration. From your first team experience and throughout the MHA Core, you'll refine your leadership abilities with strategic planning, giving and receiving constructive feedback and visioning: being able to see—and achieve—the long-term objective.

# TRANSFORM THE FUTURE OF HEALTHCARE WITH JRU'S MHA

At JRU, we start with you—helping you change careers through the right academic focus in our proven sixteen months curriculum that lets you tailor your education to your future, with leadership, global opportunities and teamwork built into the program.

After you understand the basics of healthcare, you'll start to specialize, designing your own academic schedule of electives starting in the eight-months a huge advantage in your internship and career focus.

## Start with core

In this master's in healthcare administration you'll explore the regulations, laws, court decisions, and policies that impact health service providers. Examine and analyze the latest theories, technologies, and strategies in the field. Gain the knowledge and skills to have a seat at the decision-making table and transform healthcare in your community. Our weekend and online formats are designed for working professionals. Is a comprehensive, high-value degree designed to give you a competitive advantage in healthcare, leadership, and management. ## Leadership Me, Inc.

Explore leadership and organizational theories, concepts, and trends in the healthcare setting. Gain an in-depth understanding of how to direct and organize healthcare resources and services within a variety of organizational environments. Coursework focuses on developing key leadership skills that will put you at the forefront of making changes in your organization and your community.

## Principles of Accounting

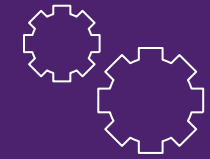

This course introduces students to the principles of double-entry systems, control accounts, and subsidiary records. It places emphasis on worksheets and variations of systems as well as accounting procedures involved with partnership and corporation capital accounts. The end results of the accounting process, such as costs, financial relationships, financial analysis, taxes, and budgeting, are investigated.

# TRANSFORM THE FUTURE OF HEALTHCARE WITH JRU'S MHA

## Critical Thinking

Students learn the fundamental questions to ask in order to analyze visual and written material. Students interrogate ideas, images, and texts within their rhetorical and historical contexts. They learn various tools for analyzing the structure of arguments and logical strategies. At the same time, students read texts that challenge them to reexamine the cultural realities we take for granted.

## Management

## of Healthcare Delivery Systems

As the reshaped American healthcare system shifts to preventive medicine and embraces managed care concepts, there is an on-going struggle to create a cost effective system without eroding the high standard of quality care that has been set. As a foundation, the students study the organization and structure of our healthcare system and options that pave the way for the emerging one. Merging theoretical constructs and practical application, students develop an understanding of the healthcare workplace and how to become effective and ethical providers, managers, decision makers, and analysts.

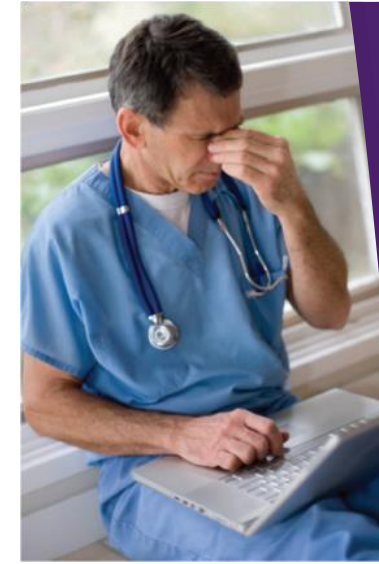

### FOUNDATIONS IN HEALTHCARE MANAGEMENT

This course is a course that focuses on issues and techniques in healthcare delivery for a variety of healthcare majors. Topics include the healthcare delivery system; concepts of health and illness; medical terminology; interpersonal communication; roles of physicians, nurses and support staff; patient assessment; critical thinking as it relates to patient care; infection control; and Occupational Safety and Health Administration (OSHA) standards.

# TRANSFORM THE FUTURE OF HEALTHCARE WITH JRU'S MHA

## Legal Aspects of Healthcare

Explore leadership and organizational theories, concepts, and trends in the healthcare setting. Gain an in-depth understanding of how to direct and organize healthcare resources and services within a variety of organizational environments. Coursework focuses on developing key leadership skills that will put you at the forefront of making changes in your organization and your community.

## Quality & Patient Safety in Healthcare

The concept of quality in healthcare has been developed by using classic theories and knowledge from a variety of disciplines. As is evident in management, quality in healthcare has been impacted by numerous trends and quick fixes, but remains the "umbrella under which patient safety resides." This course provides an introduction to quality and patient safety principles and their application to enable students to use the tools and skills in their own work environments. Students can expect to analyze problems in new and different ways; experience team problem solving; analyze risk management incidents (as well as recognize potential issues); and learn how to identify methodologies used to maintain and improve quality and safety in health care.

## Managerial Ethical issues in Healthcare

The complex interaction of ethical commitments on both personal and professional levels imposes significant decision-making obligations on managers, administrators, and staff in the workplace, especially the healthcare workplace. In addition to ethical requirements found in the work environment, individuals have their own values, morals, and ethics that can affect decisions and interactions with others. Students will have the opportunity to examine diverse ethical theories and reflect on how they may apply these principles in their respective organizational positions and in their daily lives. Using case studies, and panel discussions students explore a cross section of current ethical issues in healthcare.

## COMPUTER APPLICATIONS IN HEALTHCARE ORGANIZATIONS

The delivery of health services has become an information intensive process and is at the core of most health services professionals' activities. Computers are being used to document patient care, assist in the diagnosis and management of a variety of health conditions, measure clinical outcomes to improve quality of care, and in administrative and financial management decisions. This course provides students with knowledge to assist them in understanding the design, evaluation, selection, and utilization of computer applications in healthcare to support high quality patient care and management decisions. The need to understand the ethical and legal responsibilities of managers as health information is collected, stored, retrieved and analyzed in this rapidly increasing integration of computer application in healthcare will also be included.

# WHO WE ARE SEEKING

## WHAT CAN I DO WITH AN MHA?

A master's in healthcare administration can prepare you to take on new responsibilities and advance to leadership roles. Depending on your specialization, you can pursue career options such as:

- Ambulatory surgery center director
